

# CONTEST OLIVIER ROELLINGER

FOR THE PRESERVATION OF MARINE RESOURCES

EUROPEAN CONTEST

## Culinary contest for future professionals in the catering industry, committed to the preservation of aquatic resources.

Seafood resources are being depleted while fish and shellfish continue to attract more and more consumers. Providing a real connection between those working in the fishing and aquaculture industries and consumers, the next generation of chefs have a vital role to play in preserving resources by promoting sustainable, and often lesser known species.

Waiters play a major role in communication between chefs and customers. That's why the Olivier Roellinger contest is now also open to these professionals too.

### "Chefs" contest

(Students and professionals from Europe)

FIRST, A GOURMET STYLE RECIPE, based on a sustainable fish species, accompanied by a sustainable shellfish, crustacean or algae, which should be prepared in no more than 2 hours 30 minutes.

SECOND, A "HOME MADE" STYLE RECIPE with the same species of fish used in the gourmet recipe, which could be cooked at home, in 30 minutes.

AN ORAL PRESENTATION ON SUSTAINABILITY with a role play between the candidate and jury members and an exchange on the preservation of marine resources.

### "Waiters" contest

(Students from Europe)

A PRACTICAL TEST, by five workshops.

AN ORAL PRESENTATION on sustainability with a role play between the candidate and jury members and an exchange on the preservation of marine resources.

## TIMETABLE TEST

### Now

3rd Prize: A lunch for two in a Relais & Châteaux.

SEIZE THIS OPPORTUNITY TO MEET REPRESENTATIVES OF THE FISHERY INDUSTRY AND FAMOUS CHEFS, INVOLVED IN PROMOTING A SUSTAINABLE SEAFOOD SUPPLY CHAIN

### OLIVIER ROELLINGER

Chef at Maisons de Bricourt and Vice President of Relais & Châteaux

"This contest is for young chefs who want to take action every day for the preservation of marine resources and thus give an additional meaning to their profession. Since 2020, we wish to create connections between the waiters which will foster communication with all customers. By entering the competition, you have already won: you understand that tomorrow, fine cuisine will be part of an ecological food transition. It is a responsibility that we have each other in relation to the ocean. It is up to us to save humanity's pantry."

## TESTIMONY

### 1st prize winner 2019 CATEGORY PROFESSIONAL IN EUROPE

"I think that as chefs we have the opportunity to change attitudes

towards the destruction of the seas and oceans and the disappearance of certain species, by our choice of products, suppliers. It all depends on us, and on our desire to preserve our marine natural resources, even if that leads us to jostle our creativity."

LÉA COMBELONGE, France

### 1st prize winner 2019 CATEGORY STUDENT OF NORTH-WEST EUROPE

"I think that if the chefs pay attention to the sustainability of the species

and the way in which they were fished, to respect marine life, it would allow future generations to benefit from these resources. It was great experience during Olivier Roellinger contest to see so many people around you with the same ambitions and motivations for a better aqua live."

TERENCE VAN LENTEN, Netherlands

### 1st prize winner 2019 CATEGORY STUDENT OF SOUTHERN EUROPE

"First of all, behind every dish there is a sacrifice and as cooks we have

to acknowledge that and handle them properly with respect. Professional cooks must act urgently for the conservation of marine resources, by trying to use a wide variety of species which are mainly sustainable ones and also with this way it will be more challenging for us, as chefs we are to invent and try new techniques for the species. Additionally, they have to teach the upcoming chefs to respect marine life and choose wisely, to consider availability, sustainability and respectful catching methods for the fish."

ANTONIS AVOURI, Cyprus

### 1st prize winner 2019 CATEGORY STUDENT OF EASTERN EUROPE

In Hungary we don't eat enough seafood and fish, but I am sure,

we can use these precious ingredients well. People are afraid to use fish of the Hungarian lakes. By participating to the Olivier Roellinger contest, I can show them that with a little effort we can make amazing dishes."
